

THE COLOR & FLAVOR OF HONEY DEPENDS  
ON WHAT FLOWERS WERE VISITED  
BY THE HONEY BEES.

**MAPLE SYRUP HAS A LOWER SUCROSE  
CONTENT COMPARED TO WHITE SUGAR.**

An average size bee colony produces

**60-100**  
pounds of honey per year!

IT TAKES UP TO **40** QUARTS OF CLEAR SAP TO  
MAKE ONE QUART OF AMBER-COLORED MAPLE SYRUP!

**NORTH DAKOTA LEADS THE NATION IN HONEY PRODUCTION  
IT MUST TRAVEL ABOUT 1400 MILES TO REACH BUFFALO.**

**OUR NEW YORK STATE HONEY ONLY HAS TO TRAVEL 46 MILES  
TO REACH THE CAFETERIA.**

**HONEY MAY HELP WITH SORE THROATS AND COUGHS,  
WHICH IS WHY YOU SEE IT IN MANY COUGH DROPS!**

**The Sugar Maple Tree is  
the official tree of NYS!**

**NEW YORK STATE IS THE  
SECOND-HIGHEST  
PRODUCER OF MAPLE  
SYRUP IN THE COUNTRY!**

**ALL GRADES OF MAPLE SYRUP HAVE THE SAME SUGAR CONTENT;  
THE DIFFERENT COLORS ARE JUST DUE TO CHANGING TEMPERATURES OUTSIDE!**
